SUMMARY

Frontend engineer with **3+ years building and owning production React and React Native systems** across healthcare and marketplace products. Architected reusable frontend infrastructure powering four product verticals and owned complex real-time messaging, multi-tenant, and enterprise workflows. Comfortable across system boundaries with FastAPI, PostgreSQL, and production AI/LLM features.

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS

Frontend: React, React Native, Next.js, Redux Toolkit (RTK Query), React Navigation, Material UI, WebSockets

Backend & Data: Data Structure and Algorithms, FastAPI, PostgreSQL, Supabase, REST APIs, Row-Level Security

AI / LLM: LLM API, RAG, embeddings, pgvector, structured outputs, prompt caching, model tiering

Testing & Platform: Jest, Playwright, AWS Cognito, Firebase/FCM, Twilio, Git, CI release workflows

EXPERIENCE

Kindtech Pvt Ltd — Bengaluru, India - June, 2023 – Present

Frontend Engineer

- **Architected a config-driven React Native platform powering four marketplace verticals**, allowing each product to launch from shared configuration, theming, and navigation instead of maintaining separate screen trees. Owned supporting **React Native 0.74**, Android API-level, and Gradle upgrades.
- **Owned major parts of a production telehealth messaging platform** built with **React 18 and Redux Toolkit**, including resilient WebSocket connectivity, pagination, unread state, reactions, mentions, threaded channel/DM navigation, Twilio video visits, and role-aware clinical forms.
- **Built white-label and multi-tenant frontend infrastructure** spanning per-brand configuration, asset pipelines, theme tokens, workspace switching, and enterprise-specific filtering across client and server boundaries.
- **Improved security and maintainability of a large inherited application** by fixing a **stored-XSS vulnerability**, migrating hardcoded UI values to theme tokens, removing **841 dead files (~60K lines)**, replacing hardcoded secrets with signed-URL uploads, and introducing a force-update mechanism.
- **Extended ownership beyond the frontend** by designing a **PostgreSQL schema and migration** for patient clinical data, building a **FastAPI global-search API** and its frontend integration, and implementing functional tools for an LLM-powered clinical agent.
- **Contributed at team level through reviews and releases**, reviewing and merging **88 pull requests from 10 engineers** and handling 29 staging-to-main release integrations. Created an AI-assisted development workflow with reusable planning, codebase, and API-contract validation rules.

PROJECTS

Prep — AI-native Interview Preparation Platform

Next.js, TypeScript, Supabase, pgvector

- **Built and shipped the product end-to-end** across 10 PostgreSQL tables, 7 authenticated API routes, and 10 screens, with a deterministic spaced-repetition scheduler and **362 automated tests** covering scheduling, AI failover, **RAG grounding**, and cross-user authorization.
- **Designed a provider-agnostic AI gateway** where product code requests capability tiers rather than specific models, enabling provider changes without modifying application call sites. Added per-user usage caps and fail-closed behavior for expensive model paths.
- **Built a citation system that prevents fabricated URLs** by having models cite indexed documents from a curated **202-document pgvector corpus**, with server-side validation resolving citations against known records.

DevLinks — Developer Bookmark Manager

React, TypeScript, Redux Toolkit, Supabase

- **Built an end-to-end bookmark platform** with GitHub OAuth, collections, metadata previews, faceted search, and public sharing, backed by **database-enforced URL normalization, deduplication, and full-text search**.
- **Implemented a deterministic 84-rule resource classifier** and hardened metadata fetching against **SSRF** by resolving hostnames and rejecting private network ranges across redirect hops.

EDUCATION

Presidency University, Bengaluru 2019 – 2023

Bachelor of Technology - CSE | CGPA: [8.2/10]
